

\ STONE CORRAL IRRIGATION DISTRICT

REGULAR MEETING OF THE BOARD OF DIRECTORS

37656 Road 172, Visalia, CA 93292

April 21, 2026

AGENDA

The Board of Directors meeting of the Stone Corral Irrigation District will be held on Tuesday, April 21, 2026, at **4:30 pm**. At the discretion of the Board, all items appearing on this agenda, whether expressly listed for action, may be deliberated upon and may be subject to action by the Board. The order of agenda items is subject to revision.

- 1) **Additions or Deletions to Agenda – ACTION**

- 2) **Public Comment** (Government Code Section 54954.3 (Brown Act)) – This is the time set aside on the agenda where members of the public may provide input & comment on any matter within the jurisdiction of the Board, excluding items on the agenda, unless a public hearing on the item has previously been held. Comments shall be limited to 3 minutes per speaker, 15 minutes per subject, and 30 minutes overall for the entire public comment period, unless otherwise approved by the conducting officer, to ensure that all interested parties have an opportunity to speak. The Board cannot act on items that are not on the agenda; therefore, comments on such items may be made in the advertisement, referring to the appropriate staff for a response or directed at being placed on a future agenda. Public comments on items on the agenda should be allowed at the time the Board considers the item.

- 3) **Announcements-**

- 4) **Consent Calendar – ACTION**
 - a. Approve & Ratify March 2026 Warrants
 - b. Approve March 17, 2026, Board Minutes

- 5) **Financial Reports – ACTION**
 - a) Review March 2026 Expense and Revenue
 - b) Review March 2026 Expense and Revenue Comparison
 - c) Review March 2026 Balance Sheet
 - d) Review March 2026 Bank and Investment Report
 - e) FY 2025 Financial Statement- Action Item

- 6) **Manager’s Report: INFORMATION**
 - a) Water Operations /Maintenance Activities-See the attachment
 - b) Review Work Performance submitted by Six-33 Solutions (Dan Vink)- See the attachment
 - c) Friant Water Authority- Letter from Johnny Amaral and Inspection of the FWA Canal performed by SCID-See the attachments
 - d) East Kaweah GSA-Update- See the attachments

- e) Water Report- SCID Water Report for March 2026
- f) Flood Control- Next meeting will be April 2026, third Wednesday.
- g) New Shop- Permit was finalized. Permissions from the Tulare County Fire Department: 10,000-gallon holding tank; a 4-inch outlet hydrant hookup status to be installed for fire truck hookup; could need a bigger well pump to keep up with water demand. – Still in the process of checking if it will sustain water levels as needed.
- h) 700 Forms- Collect forms from Directors – Only need 1
- i) SCID-District Carry Over Water Policy
- j) Willitts Equipment Co. Invoice- Manager Beto wanted to ask the Board about this invoice.

Closed Session.

- a. CONFERENCE WITH LEGAL COUNSEL - existing litigation; Pursuant to Paragraph (1) of subdivision (d) of GC Section 54956.9, the Board will meet to discuss:
 - (b) Natural Resources Defense Council vs. Murillo, U.S. District Court, Eastern District of California (Sacramento Division), Case No. 88-cv-1658-LKK-GGH. Review the status of various issues related to this litigation and implementation of the San Joaquin River Settlement.
 - (c) City of Fresno et al vs. United States. U.S. Court of Federal Claims, Case No. 16-1276L.
 - (d) Friant Water Supply Protection Association v. Del Puerto Water District et al. Stanislaus Co. Sup. Court Case No. CV-20-005164.
 - (e) CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION
Initiation of litigation pursuant to paragraph (4) of subdivision (d) of Section 54956.9:
One (1) potential case

7) **Reconvene Open Session** _____

8) **Adjournment** _____

Next recommended Board Meeting Date – May 20, 2026, @4:30pm

A person with a qualifying disability under the Americans with Disabilities Act of 1990 may request the district to provide a disability-related modification or accommodation to participate in any public meeting of the district. Such assistance includes appropriate alternative formats for the agenda and agenda packets used for any public meetings of the district. Requests for such help and for agenda packets shall be made in person, by telephone, or by written correspondence to office staff at the district office, at least 48 hours before a public District meeting. The disclosable public records related to agendas are available for public inspection at the Stone Corral Irrigation District, 37656 Road 172, Visalia, California 93292.

MINUTES OF THE REGULAR MEETING
of
STONE CORRAL IRRIGATION DISTRICT

The regularly scheduled meeting of the Stone Corral Irrigation District Board of Directors was convened on March 17, 2026, at 4:25 P.M. Directors Arturo Ramirez, David Roberts, Tom Runyon, John Werner, and Joe Leal were present. Others present are: Manager Beto Rodriguez, Bookkeeper Michelle Parker, Landowner Craig Horning, and Via Teams Consultant Dale West.

Item 1) Additions or Deletions to Agenda:

Chairman Art Ramirez called the meeting to order at 4:25 pm. No additions or deletions to the agenda. Director Tom Runyon moved, seconded by Director David Roberts, to approve the agenda as presented. Motion carried. All in favor.

Item 2) Public Comment:

Chairman Art Ramirez opened the floor for open comments. Landowner Craig Hornung had concerns with the water transfers to other Districts. This will be on the next agenda.

Item 3) Announcements:

Chairman Art Ramirez opened the floor for announcements. NONE.

Item 4a/4b) Consent Calendar:

Items to approve & ratify February 2026 warrants, and approve February 2026 board minutes. Directors David Roberts and John Werner abstained from the vote, as they were not at the last Board Meeting. Approved by Director Joe Leal, seconded by Director Tom Runyon. Motion carried.

Item 5) Financial Reports.

Bookkeeper Michelle Parker presented the financial report items A-D. Action taken by Director David Roberts, seconded by John Werner. All in favor. Motion carried.

Item 6) **Managers' Report.**

Item 6a) **Water operation/Maintenance activities.**

Maintenance on the pumping stations: Cleaned and greased all pumps and cleaned the screens. Also, add oil to the container to lube the pumps. Cleaned filters. Checked sub pumps in pit for proper operation. On SC4, we cleaned the screen and filters to allow the water pressure to wash out the sludge. Maintained each pumping station, debris, and weed cleaning around each station has been maintained. Meter maintenance: There were no meters replaced in February. Valve Repairs: Continued with repairs as needed. Replaced the gaskets on the valves that were leaking. Flood Control: We are still disposing of the trash that is being dumped by outsiders. Air Vent Project: We have replaced air vents on all four main lines this February; we will continue fixing air vents that are damaged this March. The air vent project continues. Maintenance on the line: the main line on Line-B broke but has been repaired. Miscellaneous: Continue with small repairs as needed. In February, we ran 17A.F., which leaves us a balance of 3,221 A.F. Still have the 2,000 A.F. of carryover water. Projected Projects: Fencing still needs a small section of fence and a gate. The old office has moved, and repairs have started. Illegal water spray hookups are being worked on. 2-inch water meters are being installed to be able to report how much water each landowner uses when they spray. Landowners will be notified of the proper location of the hookups. We are continuing to make SCID a safer and more secure place. Still adding poles and cabling to lock off any trespassers or unwanted guests, continuing the project as time permits. SCID went to inspect the FWA canal, and we have determined that, due to the roads needing work, the sides of the canals are washed down. SCID actually wanted the Maintenance Supervisor, John Robinson, of FWA, to attend this meeting, but due to technical issues, he was not able to attend. Manager Beto and the Board of Directors discussed, and all agreed to have him at the next meeting.

Item 6b) **Dan Vink SIX-33:** Monthly Activity Detail report: Dan Vink went to a few different meetings during February. The first meeting he went to was the Con with SCID re USBOR and re Property Transfer. The second meeting he attended was the Internal Con with PM re USBOR and re Property Transfer. The last meeting he went to was the Con with PM and NEPA team re USBOR and re Property Transfer. Elizabeth J. Hochhalter attended a meeting regarding internal con re USBOR property transfer. Mtg with NEPA rep. Board report prep. She then got the total for the month. Water resource specialist, Gabriel Gaeta, went and received an update to the SCID Stormwater System Mapping.

Item 6c) **FRIANT WATER AUTHORITY:** On March 17, 2026, Johnny Amaral emailed Manager Beto Rodriguez advising him that the Trump Administration, through the Department of the Interior, announced almost \$900 million in funding awards for major water projects, many of which are FWA priorities, and close to home. This announcement was made after much input and discussion across the West, and with our water partners at the federal level. Some of the projects selected for funding are as follows:

- @ 200 million for the Friant-Kern Canal for our continued efforts to restore capacity loss due to decades of subsidence.
- \$250 million for the Delta-Mendota Canal Capacity Correction Project
- \$50 million for the San Luis Canal to address the capacity issues caused by subsidence
- \$40 million for continued planning needs for the eventual raise of Shasta Dam.

On Thursday, March 12th, Johnny Amaral spent three hours in the Governor's office participating in a meeting that included members and staff from SWRCB, representatives of the Governor's office and DWR, as well as a handful of public water agency GMs from the CVP and the SWP. He planned on providing an update in closed session at the EC and the Board meeting on the status of these deliberations. The purpose of the meeting was to continue to work through the list of concerns that the PWAs have raised with the current draft. There are still several concerns that have been raised by various agencies that they believe have not been addressed yet. But the state has indicated that their goal is to work through them. He doesn't want to speculate as to whether that effort will be successful or not, but Johnny will be back in Sacramento the day before the board meeting for a follow-up meeting on this topic with the same group. The state team has issued a 'pencils down' date of April 10. Much more information will follow. Next week, Johnny will be leading a delegation of FWA representatives in DC, as we continue to press forward on our priorities. Those include funding for infrastructure needs within the division, the implementation of the President's EO 14181, whose stated goal is to bring more certainty and reliability back to the CVP and SWP operations, and keeping momentum on implementation of the SJRRP. Johnny will be joined by FWA advocates, John Bezdek and Austin Ewell, as well as AEWS Director Scott Spitzer. They have a busy three days scheduled already, starting Tuesday afternoon and ending Friday morning. Johnny will have more to report on the progress made in DC at the March meeting. FWA updated their board meeting venue, and all meetings will now be held at the Hilton Garden Inn at 8715 W. Hillsdale Ave in Visalia.

Item 6d) **East Kaweah GSA:** Gabe Gaeta, Water Resource Specialist, attended

the EKGSA technical advisory committee meeting on March 16. The meeting centered on SGMA implementation updates within the Kaweah Subbasin and miscellaneous GSA administrative items. The Status Report on Kaweah Subbasin Implementation: Staff reported the subbasin remains in the implementation phase of the GSA. An updated implementation schedule has been prepared, but the largest remaining placeholder is the predictive groundwater model. The historic model has been updated through the 2025/early 2026 period. Predictive modeling will follow and is expected to support future attribution analyses, including how groundwater extraction in one area may affect the neighboring areas. The staff said EKGSA's near-term allocation work should not be delayed by the remaining predictive model scope. Subsidence and Bulletin 118: Consultant John Ellis presented a high-level overview of DWR's finalized Subsidence Best Management Practices (BMP) and Bulletin 118 Appendix 1, explaining that the BMP provides the technical foundation while Bulletin 118 supplies worked examples from across the Central Valley. A central concept was 'critical head,' the groundwater level threshold below which permanent subsidence can occur. Ellis emphasized that historic low groundwater levels should not automatically be treated as the same as critical head. He also discussed residual compaction, noting that subsidence may continue even after groundwater levels stabilize or begin to recover because compacting clay layers respond slowly over time. The presentation highlighted the importance of pairing groundwater level data with InSAR, GPS, extensometers, and other monitoring tools to better understand subsidence trends across the basin. The committee members noted the need to simplify and communicate these technical concepts to landowners and the public if they are later used to support management decisions. WY 2025 Annual Monitoring Report: The staff said the annual monitoring report is being finalized for an April 1 target. Existing modules from prior reporting cycles are helping accelerate completion, while new water quality and monitoring network components are also being incorporated. Flying Dragon Project: The staff reviewed site grading, drainage, and streambed design updates intended to address nearby landowner concerns about overflow and vegetation. Permitting and jurisdictional issues are still being coordinated, but the project appears to be moving toward approval. Prop 218 Update: The staff provided a preliminary update on the funding proposal and indicated that additional work is still needed on the rate structure, outreach materials, and timing for ballots, hearings, and related board actions. Potable Water Fill Station: The committee discussed partnering with Greater Kaweah GSA on a permanent potable water fill station near Farmersville to support domestic well outage response. East Kaweah expressed general support, with cost-sharing and implementation details still to be worked out. Manager Beto Rodriguez distributed a printed overview of LandIQ services to the Board of Directors for their review at their convenience.

Item 6e) **Water Report:** Manager Beto Rodriguez explained to the Directors how much water is still available and can be used as freeze water, and how it can still be carried over in 2000 A.F. Manager Beto Rodriguez then presented to the Board of Directors that the forecasts remained relatively stable, with slight increases due to our improving upcoming precipitation event. We still have about a 90% Class 1 allocation at the 90% exceedance and 97% Class 1 at the 75% exceedance, and our current 100% Class 1 allocation remains unchanged.

Item 6f) **Flood Control:** Manager Beto Rodriguez reviewed the notes from the Meeting held on January 21 at the Tulare County Supervisors' Office. Manager Beto Rodriguez advised the Board of Directors that the next meeting will be held on the third Wednesday of April 2026.

Item 6g) **New Shop:** Manager Beto Rodriguez advised the Board of Directors that the new shop is still under review with the fire department and will update them when he has more information to share. Chairman Director Art Ramirez advised Manager Beto Rodriguez to get a compaction and souls report when that time comes.

Item 6h) **700 Forms:** Manager Beto Rodriguez requested an update from the Board of Directors regarding the completion of their Form 700s in order to collect them. As most directors have not yet finalized their forms, submission is anticipated by the next board meeting or at their earliest convenience.

Closed Session- opened at 5:10 pm. Closed at 5:15 pm
No action taken

There being no further business, the Board Meeting was adjourned at 5:20 pm. by Chairman Art Ramirez.

The next Board of Directors meeting was set for April 21, 2026

Respectfully submitted,

Heriberto Rodríguez,
Secretary of the Board

Cuttone & Mastro
Certified Public Accountants
7543 North Ingram, Suite 102
Fresno, Ca 93711

This representation letter is provided in connection with your audit of the financial statements of Stone Corral Irrigation District, which comprise the respective financial position as of December 31, 2025 and 2024, and the respective changes in financial position and, cash flows for the years then ended, and the related notes to the financial statements, for the purpose of expressing opinions as to whether the financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement. An omission or misstatement that is monetarily small in amount could be considered material as a result of qualitative factors.

We confirm, to the best of our knowledge and belief, as of April 10, 2026, the following representations made to you during your audit.

Financial Statements

- 1) We have fulfilled our responsibilities, as set out in the terms of the audit engagement letter dated December 30, 2025, including our responsibility for the preparation and fair presentation of the financial statements in accordance with U.S. GAAP and for preparation of the supplementary information in accordance with the applicable criteria.
- 2) The financial statements referred to above are fairly presented in conformity with U.S. GAAP and include all properly classified funds and other financial information required by generally accepted accounting principles to be included in the financial reporting entity.
- 3) We acknowledge our responsibility for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.
- 4) We acknowledge our responsibility for the design, implementation, and maintenance of internal control to prevent and detect fraud.
- 5) Significant assumptions we used in making accounting estimates, including those measured at fair value, are reasonable.
- 6) Related party relationships and transactions, including revenues, expenditures/expenses, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties have been appropriately accounted for and disclosed in accordance with U.S. GAAP.
- 7) Adjustments or disclosures have been made for all events, including instances of noncompliance, subsequent to the date of the financial statements that would require adjustment to or disclosure in the financial statements.
- 8) The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole for each opinion unit. A list of the uncorrected misstatements is attached to the representation letter.
- 9) The effects of all known actual or possible litigation, claims, and assessments have been accounted for and disclosed in accordance with U.S. GAAP.

- 10) We are in agreement with the adjusting journal entries you have proposed, and they have been posted to the accounts.
- 11) Guarantees, whether written or oral, under which the District is contingently liable, if any, have been properly recorded or disclosed.

Information Provided

- 12) We have provided you with:
 - a) Access to all information, of which we are aware, that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters
 - b) Additional information that you have requested from us for the purpose of the audit.
 - c) Unrestricted access to persons within the District from whom you determined it necessary to obtain audit evidence.
 - d) Minutes of the meetings of District or summaries of actions of recent meetings for which minutes have not yet been prepared.
- 13) All material transactions have been recorded in the accounting records and are reflected in the financial statements.
- 14) We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud.
- 15) We have no knowledge of any fraud or suspected fraud that affects the District and involves—
 - Management,
 - Employees who have significant roles in internal control, or
 - Others where the fraud could have a material effect on the financial statements.
- 16) We have no knowledge of any allegations of fraud or suspected fraud affecting the District's financial statements communicated by employees, former employees, regulators, or others.
- 17) We have no knowledge of instances of noncompliance or suspected noncompliance with provisions of laws, regulations, contracts, or grant agreements, or abuse, whose effects should be considered when preparing financial statements.
- 18) We have disclosed to you all known actual or possible litigation, claims, and assessments whose effects should be considered when preparing the financial statements.
- 19) We have disclosed to you the identity of the District's related parties and all the related party relationships and transactions of which we are aware.

Government-specific

- 20) There have been no communications from regulatory agencies concerning noncompliance with, or deficiencies in, financial reporting practices.
- 21) We have identified to you any previous audits, attestation engagements, and other studies related to the audit objectives and whether related recommendations have been implemented.
- 22) The District has no plans or intentions that may materially affect the carrying value or classification of assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fund balance or net position.
- 23) We are responsible for compliance with the laws, regulations, and provisions of contracts and grant agreements applicable to us, including tax or debt limits and debt contracts, and legal and contractual provisions for reporting specific activities in separate funds.
- 24) We have identified and disclosed to you all instances that have occurred or are likely to have occurred, of fraud and noncompliance with provisions of laws and regulations that we believe have a material effect on the financial statements or other financial data significant to the audit objectives, and any other instances that warrant the attention of those charged with governance.

- 25) We have identified and disclosed to you all instances that have occurred or are likely to have occurred, of noncompliance with provisions of contracts and grant agreements that we believe have a material effect on the determination of financial statement amounts or other financial data significant to the audit objectives.
- 26) We have identified and disclosed to you all instances that have occurred or are likely to have occurred, of abuse that could be quantitatively or qualitatively material to the financial statements or other financial data significant to the audit objectives.
- 27) There are no violations or possible violations of budget ordinances, laws and regulations (including those pertaining to adopting, approving, and amending budgets), provisions of contracts and grant agreements, tax or debt limits, and any related debt covenants whose effects should be considered for disclosure in the financial statements, or as a basis for recording a loss contingency, or for reporting on noncompliance.
- 28) As part of your audit, you assisted with preparation of the financial statements and related notes. We acknowledge our responsibility as it relates to those nonaudit services, including that we assume all management responsibilities; oversee the services by designating an individual, preferably within senior management, who possesses suitable skill, knowledge, or experience; evaluate the adequacy and results of the services performed; and accept responsibility for the results of the services. We have reviewed, approved, and accepted responsibility for those financial statements and related notes.
- 29) The District has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
- 30) The District has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.
- 31) The financial statements include all component units as well as joint ventures with an equity interest, and properly disclose all other joint ventures and other related organizations.
- 32) The financial statements properly classify all funds and activities in accordance with [GASB Statement No. 34](#).
- 33) All funds that meet the quantitative criteria in [GASBS Nos. 34](#) and [37](#) for presentation as major are identified and presented as such and all other funds that are presented as major are particularly important to financial statement users.
- 34) Components of net position (net investment in capital assets; restricted; and unrestricted) and classifications of fund balance (nonspendable, restricted, committed, assigned, and unassigned) are properly classified and, if applicable, approved.
- 35) Investments, derivative instruments, and land and other real estate held by endowments are properly valued.
- 36) Participation in a public entity risk pool has been properly reported and disclosed in the financial statements.
- 37) Provisions for uncollectible receivables have been properly identified and recorded.
- 38) Revenues are appropriately classified in the statement of revenues and expenses.
- 39) Deposits and investment securities are properly classified as to risk and are properly disclosed.
- 40) Capital assets, including intangible assets, are properly capitalized, reported, and, if applicable, depreciated.
- 41) We have appropriately disclosed the District's policy regarding whether to first apply restricted or unrestricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available and have determined that net position is properly recognized under the policy.
- 42) Management has omitted management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. We understand that such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

CUTTONE & MASTRO

CERTIFIED PUBLIC ACCOUNTANTS

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
Stone Corral Irrigation District:

Opinion

We have audited the accompanying financial statements of the Stone Corral Irrigation District (the District) as of and for the years ended December 31, 2025 and 2024, which collectively comprise the District's basic financial statements as listed in the table of contents, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Stone Corral Irrigation District as of December 31, 2025 and 2024, and the respective changes in financial position and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis of Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities in accordance with the relevant ethical requirements related to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

~~DRAFT~~

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in circumstances, but not for the purpose of expressing an opinion on the effectiveness of Stone Corral Irrigation District's internal control. According, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements
- Conclude whether, in our judgement, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other-Matters

The District has not presented management's discussion and analysis that accounting principles generally accepted in the United States has determined is necessary to supplement, although not required to be part of the financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Operations

Stone Corral Irrigation District was formed as a special district in the State of California and is governed by a five-person Board of Directors. The District provides irrigation water to the rural area surrounding the City of Visalia in Tulare County.

Reporting Entity

In accordance with the requirements of Statement No. 14, *The Financial Reporting Entity, of the Government Accounting Standards Board (GASB)*, the financial statements must present the District (the primary government) and its component units. Pursuant to this criterion, no component units were identified for inclusion in the accompanying financial statements.

Basis of Presentation and Accounting

The District follows the provisions of the Governmental Accounting Standards Board Statement Nos. 34, *"Basic Financial Statements and Management's Discussion and Analysis- For State and Local Governments."* Statement 34, as amended. The Statement established the financial reporting standards for all state and local government entities, which includes a statement of net position, a statement of revenues, expenses and changes in net position, and a statement of cash flows. It requires the classification of net position in the following three components:

Net investment in capital assets — This component of net position consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction or improvement of those assets.

Restricted net position — This component of net position consists of constraints imposed by creditors (such as through debt covenant), grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.

Unrestricted net position — This component of net position consists of net position that do not meet the definition of "restricted" or "net investment in capital assets."

The accompanying financial statements have been prepared using the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when a liability is incurred regardless of the timing of related cash flows. The District accounts for its operations as an enterprise fund. Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises: (a) where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Cash and Cash Equivalents

Cash includes currency, demand deposits with banks and other financial institutions, and other accounts that have the general characteristics of demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash or those investments with original maturities of three months or less.

For purposes of the Statements of Cash Flows, the District considers cash on hand and in the bank as well as funds on deposit with the Local Agency Investment Fund (LAIF) to be cash and cash equivalents.

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued:

Receivables

The District utilizes the direct write-off method for bad debts. No allowance for bad debts has been provided as no material write-offs are expected for receivables at December 31, 2025 and 2024.

All receivables are considered collectible because the District obtains a lien upon the property of the landowner once the receivable becomes delinquent. The District will maintain a lien on the property until the property is sold.

Assessments, Conveyance, and Standby Charges

Assessments, conveyance, and standby charges attach as an enforceable lien on property as of January 1st. These charges are payable in two installments on December 20th and June 20th. The conveyance charge is for budgeted operation and maintenance expenditures on the Friant-Kern Canal. The standby charge is for budgeted operation and maintenance expenditures for the calendar year.

The second installments of the assessment; \$531,744 and \$482,694, conveyance; \$46,549 and \$46,725, and standby charges; \$26,269 and \$26,287, were deferred until the subsequent year and reported in the Statement of Net Position as deferred inflow of resources for the years ended December 31, 2025 and 2024, respectively.

Prepaid Water

Prepaid water represents amounts paid for water in excess of the water allocation approved by the Bureau of Reclamation. The District had no prepaid water as of December 31, 2025 and 2024.

Water Transfers/Exchange Accounts

The District engages in water transfers and exchanges with several entities. Unless a specific price is stated in the agreement the water receivable or payable is valued at the per acre foot price the District is paying for Friant Class 1 water at the reporting date. At December 31, 2025 and 2024, the District had a Friant Class 1 water rate of \$43.07 and \$48.89, per acre foot, respectively.

Capital Assets

The straight-line method has been used to determine depreciation based on the following estimated useful lives:

Vehicles and equipment	2-5 years
Transmission and distribution	5-40 years
General plant	5-30 years

Capital assets are recorded at cost less accumulated depreciation and updated for additions and retirements during the year. Repairs and maintenance and minor alterations are charged to expense as incurred. Costs which are considered improvements are added to the appropriate capital asset account.

Gains and losses on disposition of capital assets are reported and recognized in the year of disposition.

Income Tax

The District qualifies for tax-exempt status as an integral part of the State of California or a political subdivision in accordance with Internal Revenue Code (IRC) Section 115. As a result, no tax provisions apply to the District's income.

DRAFT

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued:

Operating and Non-operating Revenues

Operating revenues generally result from providing services and producing and delivering goods in connection with the District's principal ongoing operations. The principal operating revenues are water sales, pumping, conveyance, standby charges, and assessments. Exchange transactions are those in which each party receives and gives up essentially equal values. All revenues not meeting this definition are reported as non-operating revenues.

Uses of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investments in Power Authorities

For investments in power authorities classified as joint ventures, where the District participates in the profit and losses of the joint venture, the initial investment is recorded at cost and adjusted to reflect the District's share of the joint venture's profit or losses. If the District is involved in joint control of the power authority but there is no ongoing financial interest or ongoing financial responsibility, the entity is a jointly governed organization and not a joint venture.

Joint Governed Organizations

The District participates and associates with several joint power authorities (JPAs) and other organizations for the purpose of coalition building and sharing of costs with similar agencies to help achieve overall reduced costs. The District has ongoing financial interests and/or financial responsibility (but no equity interests) with the following JPAs:

Friant Water Authority - Formed in 2004, for the purpose to, among other things, acquire, protect, preserve and enhance water supplies and water rights, related to our contracts with the USBR. The Authority also operates and maintains the Friant-Kern canal.

Eastern Kaweah Groundwater Sustainability Agency - The Agency (GSA) is comprised of eight special districts for the purpose of managing groundwater in a sustainable fashion. The GSA is governed by a board of directors consisting of representatives from each member district. In 2020, the District provided a loan to the GSA in the amount of \$121,048 to help assist with the costs of installing monitoring networks. No payments were received in 2025 or 2024. The loan is without interest.

2. CASH AND CASH EQUIVALENTS

At December 31, 2025 and 2024, the cash and cash equivalents consist of the following:

	<u>2025</u>	<u>2024</u>
Cash on Hand	\$ 90	\$ 90
General checking — Bank of America	778,898	422,997
Stifel Smart Rate Program-Bank and Trust	278,188	268,004
Stifel Smart Rate Program Bank	278,188	268,004
Cetera Flexinsured account	1,517,627	-

	<u>\$ 3,662,291</u>	<u>\$ 2,800,277</u>

DRATI

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

2. CASH AND CASH EQUIVALENTS, continued

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the District will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial risk for investments is the risk that, in the event of the failure of the counterparty (e.g. broker-deal) to a transaction, the District will not be able to recover the value of its investment or collateral securities that are in possession of another party. The California Government code requires that a financial institution, secure deposits made by state or local government unit by pledging securities in an undivided collateral pool held by a depository regulated under state law. The market value of their pledged securities in the collateral pool must equal at least 110% of the total amount deposited by public agencies. California law also allows financial institutions to secure District deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits. The Company maintains cash at various banks. Cash accounts at each bank are insured by the FDIC for up to \$250,000. The amounts in excess of the insured limit were approximately \$587,195 and \$215,052 as of December 31, 2025 and 2024, respectively.

Custodial credit risk does not apply to a local government's indirect investment in securities through the use of government investment pools such as LAIF.

Investments Authorized by the California Government Code

The table below identifies the investment types that are authorized for the District by the California Government Code. The table also identifies certain provisions of the California Government Code that address interest rate risk, credit risk, and concentration of credit risk.

<u>Authorized Investment Type</u>	<u>Maximum Maturity</u>	<u>Maximum Percentage of Portfolio</u>	<u>Maximum Investment in One issuer</u>
Local Agency Bonds	5 years	None	None
U.S. Treasury Obligations	5 years	None	None
U.S. Agency Securities	5 years	None	None

Medium-Term Notes	5 years	20% of base value	None
Mutual Funds	N/A	30%	None
Money Market Mutual Funds	N/A	20%	10%
Mortgage Pass-Through Securities	N/A	20%	10%
County Pooled Investment Funds	5 years	20%	None
Local Agency Investment Fund (LAIF)	N/A	None	None
JPA Pools (other investment pools)	N/A	None	None
		None	None

STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024

2. CASH AND CASH EQUIVALENTS, continued

Investment Policy

The District has not adapted an Investment Policy for its cash and cash equivalents.

Interest rate risk

Interest rate risk is the risk that changes in market interest rates that will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. The policy of the District is to limit the weighted average maturity of the District's fund to five years or less.

Concentration of Credit Risk

The District has no limitations on the amount that can be invested in any one issuer beyond that stipulated by the California Government Code. Investments in any one issuer that represent 5% or more of total District investments are as follows:

	<u>2025</u>		<u>2024</u>	
General Checking and Treasury Accounts — Bank of America	\$ 778,988	21%	\$ 423,087	15%
Local Agency Investment Fund	809,300	22%	774,243	28%
Cetera Tbills	-	-	1,066,939	38%
Cetera Flexinsured Account	1,517,627	42%	-	-
Stifel Smart Rate Program	556,376	15%	536,008	19%

Investment in State Investment Pool

The Local Agency Investment Fund is a government investment pool managed and directed by the California State Treasurer. The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis. The District may withdraw monies upon one-day-notice. The average monthly effective yield was 4.03% for December 31, 2025 and was 4.43% for December 31, 2024. The District's investment in the Local Agency Investment Fund was not subject to credit risk categorization and is carried at amortized cost which approximates fair value. All pooled funds are regulated by the California Government Code.

3. RECEIVABLES

At December 31, 2025 and 2024, the total receivables consist of the following:

	<u>2025</u>	<u>2024</u>
Water sales	\$ 69,974	\$ 999,737
Assessments	529,696	628,023
Standby	125	15,651
Conveyance costs	-	10,684
Other	17,448	4,832
	<u>\$ 617,243</u>	<u>\$ 1,658,927</u>

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

4. CAPITAL ASSETS

The following is a summary of changes in the capital assets during the year.

	<u>Balance</u> <u>12/31/24</u>	<u>Additions</u>	<u>Deductions</u>	<u>Balance</u> <u>12/31/25</u>
Capital assets not being depreciated				
Land	\$ 147,767	\$ -	\$ -	\$ 147,767

Vehicles & equipment	<u>237,713</u>	-	-	<u>237,713</u>
Totals	<u>5,427,917</u>	<u>56,111</u>	-	<u>5,484,028</u>
Less Accumulated depreciation	<u>(5,042,831)</u>	<u>\$ (55,985)</u>	\$ -	<u>(5,098,816)</u>
Total capital assets being depreciated	<u>385,086</u>			<u>385,212</u>
Net Book Value	<u>\$ 2,593,756</u>			<u>\$ 2,593,882</u>

5. INVESTMENT IN JOINT POWER AUTHORITY

The District participates in a joint power authority (JPA) South Valley Water Association (SVWA). The SVWA was formed through a memorandum of understanding on April 1, 2017 solely to address water supply related issues of common concern to the participants. The SVWA was comprised of 7 members with the District having a 7.31% membership share. The JPA is not component unit of the District, however, the JPA is considered a joint venture as defined by GASB No. 14. The investment in the SVWA at December 31, 2025 and 2024 is \$0 and \$1,352 respectively. The District's share of the loss on investment from SVWA for the years ended December 31, 2025 and 2024 was \$(1,352) and \$(1,649), respectively. The SVWA was dissolved in 2025.

6. LONG-TERM NOTE PAYABLE

On October 28, 2024, the District was issued a loan from John Deere Financial to acquire a Backhoe Loader. The original amount of the loan was \$136,608, and it is payable in annual payments on April 10, each year beginning April 10, 2026 for a period of 3 years. The interest rate is 6.35% per annum. First annual payment was made on April 10, 2025. Outstanding loan payment schedule is as follows:

<u>FY</u>	<u>Date</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2027	4/10/2027	\$ 42,280	\$ 5,709	\$ 47,989
2028	4/10/2028	<u>45,045</u>	<u>2,944</u>	<u>47,989</u>
Total:		<u>\$ 87,325</u>	<u>\$ 8,653</u>	<u>\$ 95,978</u>

A summary of the District's long-term liability to John Deere Financial as follows:

<u>Dec 31, 2024</u>			<u>Dec 31, 2025</u>	<u>Current</u>	<u>Long-Term Debt</u>
<u>Balance</u>	<u>Additions</u>	<u>Deductions</u>	<u>Balance</u>	<u>Portion</u>	
\$ 136,608	\$ 0	\$ 49,598	\$ 87,325	\$ 0	\$ 87,325

DRAFT

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

7. NET POSITION

The business type activities financial statements utilize a net position presentation. The District's net position is categorized as net investment in capital assets (net of related debt) and unrestricted.

Net Investment in Capital Assets — This category groups all capital assets, into one component of net position. Accumulated depreciation and the outstanding balances of debt that are attributable to the acquisition, construction or improvement of these assets reduce the balance in this category. As of December 31, 2025, and 2025, the net investment in capital assets amounted to \$2,506,557 and \$2,456,833, respectively.

Unrestricted Net Position — This category represents net position of the District that do not meet the definition of "restricted" consisting of restraints placed on net position use through external constraints imposed by creditors, or net investments in capital assets. As of December 31, 2025, and 2024, the unrestricted net position amounted to \$3,724,817 and \$3,922,555, respectively.

8. RELATED PARTY TRANSACTIONS

The District sells water to members of the Board of Directors under the same terms and conditions as unrelated parties.

9. COMMITMENTS AND CONTINGENCIES

Water Delivery Contract

The District is committed each year, through February 28, 2026, to purchase from the United States Bureau of Reclamation (USBR) up to 10,000-acre feet of Class I water. The price of water is established annually by the USBR to pay the cost of operations, maintenance, restoration, and surcharge fees of the Central Valley Project for the term of the contract. A factor in determining the cost of water is the operating and maintenance deficit or surplus the District has with the USBR. The District had an operating and maintenance surplus of \$5,000 as of September 30, 2024, that will be used in determining water rates.

In addition, as of September 30, 2024 the District had a capital and construction cost deficit of \$86,184. The construction costs will continue to accumulate annually and be due by 2030. As of the issuance of the Districts audited financial statements, the Districts operating and maintenance deficit or surplus and capital and construction cost have not been determined by the USBR for the year ended September 30, 2025.

Pension Plan

On January 8, 1993, the District adopted a Simplified Employees' Pension (SEP) Plan. The SEP is a defined contribution plan which requires employer contributions of 4 percent of qualified salaries. Employees become fully vested in the plan after 3 years of service. For the years ended December 31, 2025 and 2024, the SEP covered 7 employees and 4 employees and covered salaries totaled \$142,846 and \$150,820, respectively. Total employer contributions for the years ended December 31, 2025 and 2024 amounted to \$5,713.85 and \$6,355, respectively.

Health Insurance Benefits

The District currently provides certain health care benefits for its employees, current directors and a retired director. The amount of \$124,832 and \$86,227 was recognized for health insurance expense for the years ended December 31, 2025 and 2024, respectively.

DRAFT

**STONE CORRAL IRRIGATION DISTRICT
NOTES TO BASIC FINANCIAL STATEMENTS
December 31, 2025 and 2024**

9. COMMITMENTS AND CONTINGENCIES, continued

Joint-Powers Authority-Friant Water Authority

As a Friant contractor the District is obligated to share in the cost of operating and maintenance costs of the Friant-Kern Canal. An agreement also exists between the Friant Water Authority (the Authority) and the San Luis & Delta-Mendota Water Authority (SLDMWA) that defines how the Authority is to compensate SLDMWA for the water delivered to Settlement (Exchange) Contractors from their project facilities. Settlement contractors receive their water without charge from those facilities and Friant Division Contractors are responsible for the OM&R costs incurred by the SLDMWA in delivering Settlement water. The District is also obligated to share in these costs.

Other Cases

Stone Corral Irrigation District, as a member of the Friant Water Authority (the Authority), is also a party through the Authority in various cases currently in litigation concerning releases of water from Friant Dam into the San Joaquin River. Adverse decisions on these litigations could significantly reduce the water supply available to the District. The financial impact of an unfavorable decision in any of the cases mentioned above cannot be estimated.

10. SUBSEQUENT EVENTS

In compliance with accounting standards generally accepted in the United States of America, management has evaluated events and has determined there are no other events that require disclosure in accordance with accounting standards generally accepted in the United States of America. These subsequent events have been evaluated through April 10, 2026, which is the date the financial statements were issued.

Monthly Maintenance Report

April 2026

TABLE OF CONTEXT

- Maintenance on SC's
- Meters Maintenance
- Maintenance on the line
- Miscellaneous
- Daily Routes
- Flood control
- Air Vent Repair Project
- Projected Projects
- SCID meeting with FWA

Maintenance on Pumping Station's

Main Stations :57.9, 59.33, 60.9,62.68,

- SC1 Main. Cleaned and greased all pumps. Cleaned screens. Added oil to container to lube pumps. Cleaned filters.
- SC2 main. Cleaned and greased all pumps. Cleaned screens and filters. Check sub pump in pit for proper operation.
- SC2-A. Clean and greased all pumps. Sprayed weeds picked up debris.
- SC3 Main. Cleaned and greased all pumps. Cleaned screens and filter was cleaned out.
- SC4. Clean and greased all the pumps. Cleaned screens and filters. Pump 1, foot valve replaced. Screen chain link broke due to

the force of rock going in the screen. Screen pump link broke at the same time, though it has been repaired.

- SC4-A. Cleaned area, greased pumps.
- SC5. Cleaned screen and filters, and greased pumps. As well as maintaining the station, blower and debris cleaning.
- SC6 main. Cleaned and greased pumps and changed filters. Maintaining the station, debris, and weed cleaning. Pump 2 main shaft leak repaired.

Meter Maintenance

No meters replaced in March.

Valve Repairs

- Continue with repairs as needed.
- Replacement of gasket on valves leaking.
- C-18 water valve repaired.
- A-6 valve turn on/off tip repaired.

Flood Control.

Trash dumped by outsiders is being picked up and is being disposed of. Spraying of weeds continue, Ave 392 ditch east to rd. 172 and ditch on rd. 384 north to Ave 388 North is being sprayed.

Air Vent Project

Have replaced air vents in the four main lines this March; will continue fixing air vents that are damaged this April, air vent project continues.

Maintenance on the line

Drained C Line, water season began.

Miscellaneous

Continue with small repairs as needed.

DAILY ROUTES

7:00AM-TO- 9:00AM MORNING ROUTE

2:15PM - TO – 4:00PM CLOSING ROUTE

9:00 AM- TO - 2:00PM PROJECTS AND ANY EMERGENCIES IN THE DISTRICT.

Projected projects

Fencing still needs a small section of fence and gate.

Moved old office and repairs have started.

Illegal water spray hookups are being worked on. 2-inch water meters are being installed to be able to report how much water landowners use for spraying. Landowners will be notified of the proper location of hookups.

We are continuing to make Stone Corral Irrigation District more secure, we have been installing poles and cabling to lock off any trespassers, project continues.

SCID went out to inspect the FWA canal, due to roads needing work and side of canals being washed down. Pictures will be provided for more info

SCID Meeting with FWA Maintenance Supervisor

Maintenance Supervisor John Robinson, beginning of year and end of year maintenance supervisor of Frait Water Authority.

Subject: CEO Update 3/28/26

Good morning.

This week's report will be a little shorter than usual. We covered so much ground on Thursday and I don't want to be overly repetitive.

FWA ANNUAL MEETING

I am excited to report that Ed Ring has agreed to attend and be a part of the program at this year's Annual meeting on 5/21. I know some of you follow his work closely, but for those who don't.....

Edward Ring | Director, Water and Energy Policy

Edward Ring is the director of water and energy policy for the California Policy Center, which he co-founded in 2013 and served as its first president. He is also a senior fellow with the Center for American Greatness, and a regular contributor to the California Globe. His work has appeared in the Los Angeles Times, the Wall Street Journal, the Economist, National Review, City Journal, and other media outlets. Ring's undergraduate degree is in Political Science from UC Davis, and he has an MBA in Finance from USC. Ring is the author of several books, including "Fixing California – Abundance, Pragmatism, Optimism" (2021), "The Abundance Choice – Our Fight for More Water in California" (2022), and "Solutions – Innovative Public Policy for California" (2024).

Ed's participation is another reason why you won't want to miss this year. The program is coming together, and I hope you'll reach out to your neighbors, business partners, friends, family, and others to extend an invitation. It is open for all to attend.

BOARD MEETING RECAP

This month's meeting went longer than usual, but we had a hefty agenda, and we managed to push our way through all of them. For some of the items, the work we put in this week signals the end of the beginning, with more work to do, but I hope you're as pleased as I am with the status on all of the important issues and projects we worked through.

Later in the afternoon on Thursday, FWA staff met with managers and representatives from Saucelito Irrigation District and Tea Pot Dome Water District to go over some of the final details on the projects, including sequencing, constraints, and other items, and the districts are ready to proceed.

On Friday, I had connected with Assistant Secretary for Water and Science Andrea Travnicek, Acting BoR Commissioner Scott Cameron, and BoR Regional Director Adam Nickels, and others in the Trump Administration and at BoR. I was able to share with them the action taken in open session to proceed with our plan for the OBBB funding, starting with the Phase 1 pump stations. They were thrilled that we're moving so quickly, and they asked that I continue to work closely with them to coordinate any

announcements or groundbreaking plans for early this summer. This is something that's squarely on the Secretary's radar, as well as the White House. Staff is moving quickly, and we intend to begin the solicitation on Monday, March 30. Much more to follow.

WATER EDUCATION FOR LATINO LEADERS (WELL) tour of Friant Dam - 3/27

Friday afternoon, I helped lead a tour of what ended up being about 50 local elected officials from across the state. From as far as south the Imperial Valley, to as far north as the Bay Area. We spent about two hours, starting with a California water issues briefing in the office at the base of the dam, followed by a walking tour of the river outlets, and from the top of the dam. We will share some of the photos from that tour on the FWA eWaterline. I was joined by staff from BOR, including Rain Emerson, Rufino Gonzales, and Christian Buonrosto, who did an excellent job.

That's all for this week's update. Thank you again for all your work serving FWA and the Friant division.

JOHNNY AMARAL

Next Meeting	May 1, 2026	

**FKC MRCCP Outstanding Scope Summaries
Friant Water Authority
March 26, 2026**

Phase 1 Replacement Pump Stations Project

- 5 new Pump Stations; 1 for Teapot Dome W.D, 4 for SID
- TBID DCTRA Pits Turnout *
- TBID Turnout Modifications to existing Terra Bella Pump Station*
- Modifications to Deer Creek Wasteway Turnout*
- 2 Storm Drain Pump Stations in abandoned canal (currently Pools 1 and 2)*
- Final connections of 6 each 48" drain culverts to abandoned canal (currently Pools 1 and 2)*

(* items descope from the Phase 1 Canal Project during construction)

Phase 2A Canal

- 2.6 miles of new parallel canal from Avenue 136 northwards to Tule River
- 3 roadway siphons (Avenue 136, State Highway 190, and Avenue 152)
- 2 canal tie-ins

(Note: There are no Replacement Pump Stations in Segment 2A)

Phase 2B & 2C Canal

- 6.7miles of new parallel canal from Avenue 64 southwards to Avenue 16
- 4 roadway siphons (Avenue 56, Avenue 48, Avenue 40, Avenue 24)
- White River Check Structure
- 8 Replacement Pump Stations; 6 for DEID, 2 for KTWD
- 2 Storm Drain Pump Stations
- Number of canal tie-ins dependent on sequencing

Phase 2 Liner and Associated Turnout Raises

- 7.5 miles lining raise from Tule River northwards to 5th Avenue check
- 4.8 miles lining raise southwards from Avenue 16 to Lake Woolomes

**Phase 1 Replacement Pump Stations
March 2026 Cost Estimate Update (5)**

	Low	High
Construction Cost Estimate	44,000	52,000
Contingency (~10%)	4,000	5,000
ROW	-	-
Utilities	1,000	1,000
CM / PM	8,000	9,000
Total Estimated Cost	57,000	67,000

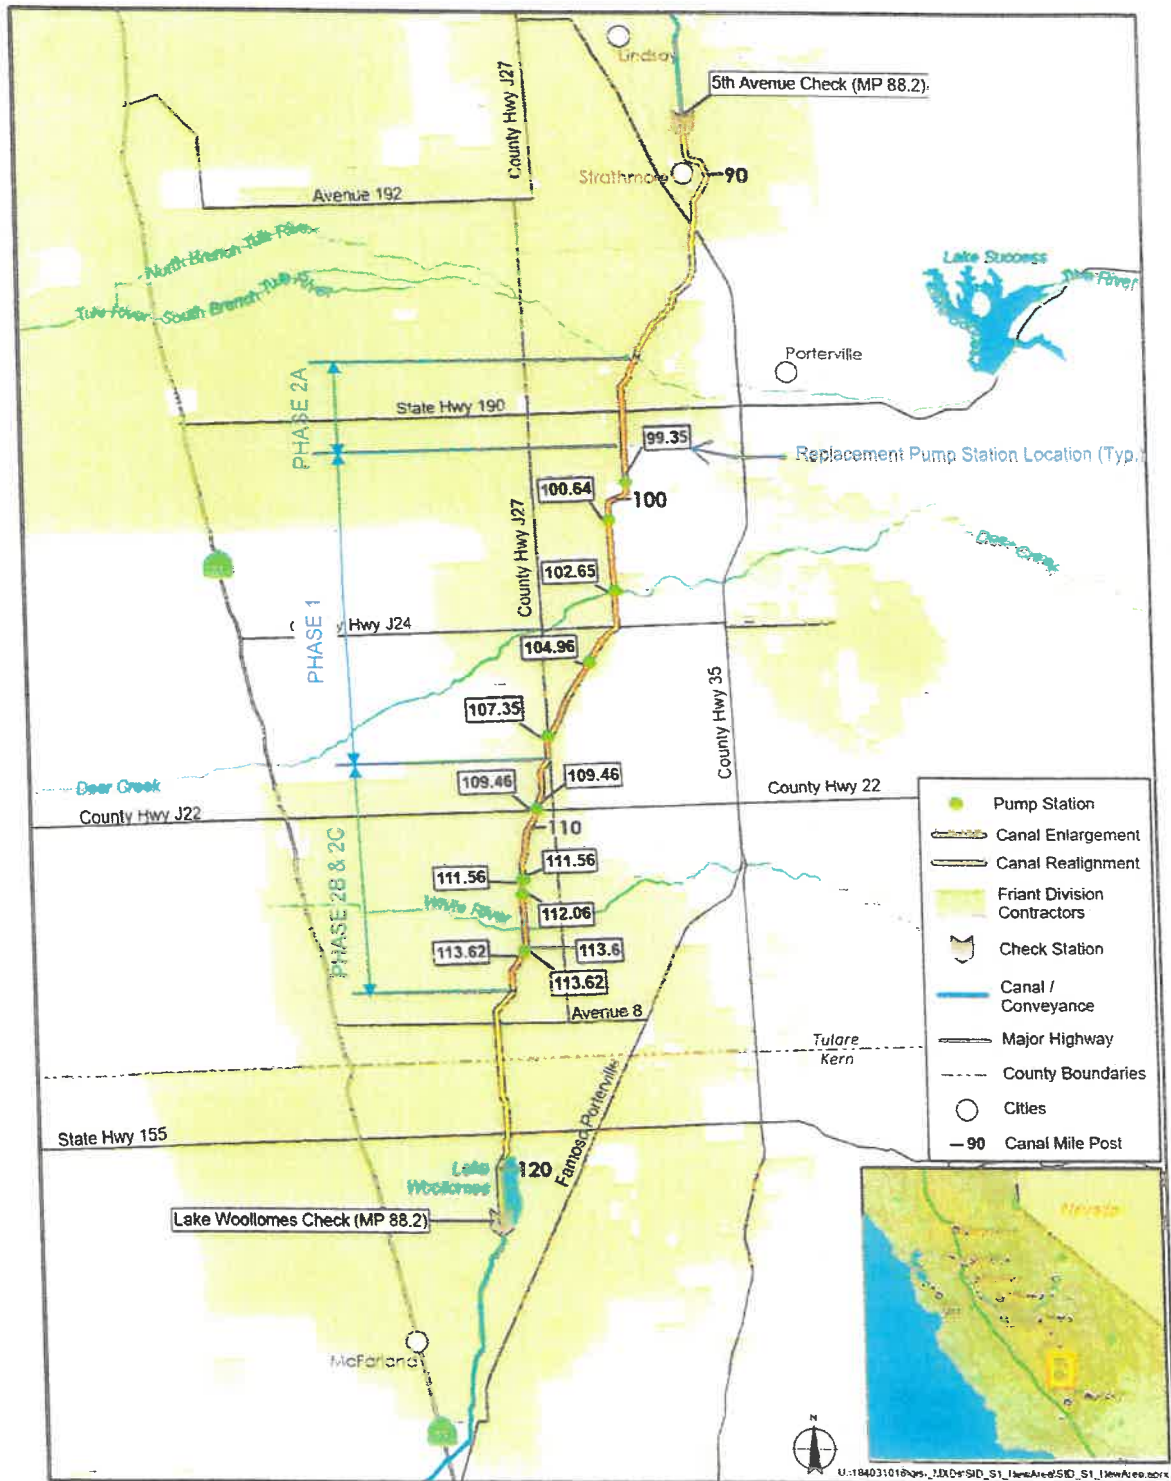

**Phase 2A, Middle Reach Capacity Correction Project
(Scope currently under Refinement)**

	Low	High
Construction Cost Estimate	73,000	88,000
Contingency (~10%)	7,000	8,000
ROW	10,000	10,000
Utilities	3,000	4,000
Phase 2 Pump Station Design	4,000	5,000
CM / PM	21,000	23,000
Total Estimated Cost	118,000	138,000

Phase 2B & 2C, Middle Reach Capacity Correction Project

	Low	High
Construction Cost Estimate (B)	194,000	233,000
Contingency (~10%)	19,000	23,000
ROW (included in Phase 2A scope)	-	-
Utilities	1,000	2,000
CM / PM	40,000	44,000
Total Estimated Cost	254,000	302,000

Subject: CEO UPDATE 4/11/26

REPLACEMENT PUMPSTATIONS PROJECT UPDATE

The schedule that FWA staff laid out at the March Board meeting is still holding. On April 16, FWA staff and Stantec will be hosting a mandatory pre-bid meeting for all contractors that plan to submit bids. The meeting will start in the Lindsay office with a PowerPoint presentation on the history and details of the project, followed by a site visit at each of the 5 pump station locations. Based on feedback from Stantec, and the traffic we've seen on the PlanWell and Builders Exchange websites, we're expecting a large turnout of contractors and/or contractors' representatives. In between the meeting next Thursday and the day that all bids are due, interested contractors MAY request additional details or site visits, which FWA staff will accommodate.

Assuming the schedule continues to hold, FWA staff intends to ask the Board to take action to award the contract at the Board meeting in May. More to follow...

DELTA MENDOTA CANAL PROJECT UPDATE

Wilson and I had a busy week in Los Banos. On Monday, the SLDMWA Planning committee met to discuss several options to move forward with their project. Then again on Thursday, he and I attended the monthly Board meeting, where there was another discussion, albeit brief, on this topic.

The option that SLDMWA staff is recommending is a project that would only utilize non-reimbursable funding they have available to them (\$235 million from OBBB, and an additional \$34 million from the State of California). What's being contemplated at this moment is a project that would raise the liner between Jones Pumping Plant and the DCI, address the various segments of the DMC where they've experienced a "sag", replacement of high priority bridges in the upper DMC, and replacement of the two highest priority bridges in the lower DMC, one at Russell Avenue, and the other at Althea Avenue. They are busy getting revised cost estimates, as well as an updated understanding of exactly how much capacity each of these actions will restore, particularly with the bridge work. FWA staff will remain engaged with them in anticipation that Federico will be seeking Board action at their board meeting in May. Pursuant to the revised MOU with SLDMWA, the Planning Committee will need to meet and make a unanimous recommendation earlier that week. And I plan of discussing the proposal(s) at the FWA EC and BOD meetings in April. More to follow...

HRLs PENCILS DOWN...SORT OF

The April 10 pencils down deadline imposed by the State team was yesterday. Based on a series of in person only and a few virtual meetings over the last 6 to 8 weeks, some changes were made to a number of provisions where concerns had been expressed by the PWA's, Ian, Bezdek, and I will provide a complete overview of the changes, schedule, and the end result from the last two months of meetings at the April BOD meeting. We will be looking for thoughtful input on the proposal, as it stands today.

Snow Course Measurements for April 2026

April measurements received as of Fri, April 10, 12:12 PM

Snow depth and water content are in inches. April 1 averages are based on measurements made during years 1966-2015. Courses are grouped by river basins, listed in north-south and high-low elevation order. Contact *Snow Surveys Staff* for more information.

Precipitation Forecast & Validation

Week	-4	-3	-2	-1	Current Week	+1
Date Range (6 days)	3/12-3/18	3/19-3/25	3/26-4/1	4/2-4/8	4/9-4/15	4/16-4/22
90% Forecast (in)	0	0	5	1	1.5	1
50% Forecast (in)	0	0	1.3	.3	2.5	.5
10% Forecast (in)	0	0	0.2	0	0.5	0.1
ASO Survey (in)	0	0	0.2	0	0	0

Precipitation trends: While the previous storm severely underperformed, confidence is higher for the April 10-12 storm.

Snowpack Water Volume

Range in snowpack models (TAF)	Last ASO Survey	Reclamation Consensus (TAF)	Consensus SWE
254-438	430	335 (4/8)	
Change over last week (TAF)	ASO Survey	Consensus Confidence	
-76 TAF	3/29	Medium ¹	

Forecast factors affecting snowpack: Used the 4/8 isnotal report for snowpack state. ¹ confidence options: Very High/High/Med/Low/Very Low

Current Month Runoff Trends (50% exceedance)

Forecast Date	3/26	4/2	4/9
NWS-CNRFC Forecast (TAF)	292	245	266
Reclamation Consensus (TAF)	—	230	230

Reclamation Rationale: Believe CNRFC March runoff estimates to be slightly high based on observed NR and snowpack.

WY Runoff Forecasts (50% exceedance)

Model	Date	Status	50% Exceedance Forecast (TAF)
DWR — WSI/8120	4/1	Operational	1390 (560 A)
NWS — CNRFC	4/9 ¹		1650 (830 A)
WRF-Hydro (ASO Inc)	4/4	Experimental	1464 (654 A)
DHSVM (Mtn Hydro LLC)	N/A		—
Water Budget (USBR)	4/9		1405
Historic Runoffs (USBR)	4/9		1385
Runoff Recession (USBR)	—	—	—

Forecast trends: Early runs of Water Budget Model should have low weighting.

WY Runoff Consensus (Reclamation Hybrid Forecast)

Forecast Date	3/12	3/19	3/26	4/2	4/9
90% Forecast (TAF)	1257	1252	1264	1271	1270
50% Forecast (TAF)	1115	1125	1114	1257	1304
25% Forecast (TAF)	1197	1173	1171	1285	1351
50% Forecast (TAF)	1511	1479	1497	1361	1412
25% Forecast (TAF)	1639	1572	1583	1436	1500
ASO Survey (in)	—	—	—	—	—
Blend (DWR/NWS)	30/70	20/80	60/40	80/20	50/50
Add'l Scale	0.830	0.880	0.960	0.780	.810
Dispersion	1.00	1.00	1.00	1.05	1.00
Slew	-20	-40	-5	0	0

Reclamation Rationale: Reclamation blended forecast is responding to apparent overestimate of snow by CNRFC, lower March runoff estimates by DWR, and lower experimental runoff model values

Miguel,
What time is the meeting? I wasn't given any advance notice. Beto was supposed to send me an invite but I never received one

Miguel,
I could probably make it on teams. I would not be able to be there in person unfortunately which I had intended but that's ok. It can still work. Thanks for the invite

It starts at 430 pm I will get with Beto to get you a TEAMS or ZOOM link ready and send it to you. Sorry about the delay.

Thank you,
Miguel Villa

Gents,

You should make a small folder separate from your regular board folder for this presentation I would think. It can include the attached list of concerns, the excel spreadsheet and the photos you have shared with me. Maybe you can arrange the pictures in order to follow the bullet points I am presenting. That would make it very efficient. Just a suggestion. Any questions please let me know. If you need me to have the material prepared please give me a head count of how many folders to prepare and I can bring them with me. Thank you.

Subject: CEO UPDATE 4/4/26

FEMA REIMBURSEMENT ANNOUNCEMENT

Early last week, FWA staff received notification from the California Office of Emergency Services that after review of our application for disaster funds through FEMA, our application was approved. We received a check for \$1.1 million to reimburse us for the costs incurred to replace the nearly 200 panels that failed during the flooding event of that year, as well as costs incurred to remove sediment that built up in the lower reach of the FKC.

It's worth noting that Congressman Jim Costa and his staff were very helpful for us. They made the right contacts at the right time to ensure that our application for funds was timely and given the attention it needed to make its way through the review and approval process.

Internally, FWA staff Charmel Cajimat and John Robinson, did much of the heavy lifting to make sure our documentation and application were in order. And we are very thankful for their work on this effort.

At the next Executive Committee meeting, we expect to discuss the details of the reimbursement, including next steps.

FRIANT-KERN CANAL OBBS FUNDING UPDATE

As detailed in last weekend's report, the solicitation for bids on the Phase 1 pump stations project has gone out. We received a few inquiries from interested contractors already. So, as of now, the project and process are going as envisioned, per the schedule that staff laid out at the board meeting. The next milestone is a mandatory pre-bid conference with all interested contractors, which will be held in the Lindsay office on April 16. That meeting will start with introductions and a briefing of the project and will end with a site visit of all five locations.

As of now, we still expect to be able to review the bids and award the contract before the end of May, and to plan a groundbreaking ceremony sometime in mid to late June.

DELTA-MENDOTA CANAL OBBS FUNDING UPDATE

As you know, the San Luis and Delta Mendota Water Authority also received a funding award from the OBBS for their capacity correction project. Early this week, SLDMWA ED Federico Barajas provided a briefing for Wilson and I on his initial thoughts on how to utilize the funding. There are several options they could consider, but Federico intends to recommend a plan that would fund a project that utilizes ONLY the non-reimbursable funds they have available to them, which includes just over \$30 million from the State of California.

Stone Corral Concerns and Timeline

Photos from 3/17/2026

- **Panel Damage (Nov.15 – Jan. 31st)**
Approximately 55 panels have been identified for replacement in the Dewatering set to begin Nov 15th. Panels can only be replaced during a dewatering event which occurs every 3 years. Panels that collapse between dewatering are filled with rip rap and wait for the next upcoming dewatering. Panels being replaced are slightly north of SC seen in the photos and additionally there are panels about 1 mile south of SC 4 that will be replaced as well.
- **Road Damage (June – Oct. 2026)**
Chip seal is a major maintenance project that takes place annually. This project has not been scheduled for a few years previous to 2026. The budget is already approved for approximately 10 miles of chip seal to be done in fiscal year 2026. This process involves grading the entire section to be sealed removing high spots and dips. The area is then treated with Tac oil and chipped rock is spread over the oil. The rock is then compacted in place adhering it to the oil. The 10 miles will begin at MP 60.95 (SC3) and continue approximately 10 miles upstream. This span will travel throughout SC district into OC district. The 10 miles is dependent on pricing of materials. Due to fluctuating prices of petroleum the oil pricing may limit the number of miles we actually achieve.
- **Beach Belting (undefined)**
Beach belting exists in approximately 20-22 miles of FKC. Multiple areas have been identified throughout the unlined section as needing repairs. (see attached) The size of the project places it in the “major maintenance” category. Until recently the volume of material was undefined. The attached sheet demonstrates the amounts of rock needed for both sides of the canal to be addressed and the pricing associated by MP. This workbook was generated after an extensive field review was conducted in Feb. of 2026. Special budgeting will need to be approved by BOD to begin this project. With a better idea of pricing the conversation can now begin. With dewatering slated for FY 2027 it is doubtful this project would be considered. Possible consideration for FY 2028
- **Desilting and Sand Deflectors (Nov 15- Jan 31)**
Desilting is always scheduled during dewatering. Among the districts identified for desilting is SC and OC. The unlined section has multiple areas which are

Stone Corral Concerns and Timeline

challenging as it relates to sediment build up. This problem is compounded by the fact it can only be addressed effectively every 3 years. We have had luck in other areas by utilizing sand deflectors or "dog houses". Many previous sand deflectors were removed when districts began adding traveling screens because the design would not accommodate the screen. We have decided to purchase materials in advance and design and build deflectors during this dewatering to help address some of the most troubled areas. We will desilt the turnout and inspect the gates. If needed we will repair slide rails, adjust closure, sand blast and paint the gates as well.

*Note removal of traveling screens is the responsibility of the district. Friant does not take responsibility for this process.

Due to time restraints associated with drain down (roughly 8 weeks) I am requesting the districts provide a list ranking the order in which you would like turnouts addressed starting with the most problematic.

- **Bridges and Suspended Pipes**

The concrete bridges in SC section belong to the county and are under the custodial care of the county as well. Wooden farm bridges are under FWA. If repairs or work on concrete bridges is needed the request must be made to the county. Pipes suspended from bridges are the responsibility of the district including suspension mechanism, thrust blocks etc.

*Note Friant has engaged in bridge coating in areas where liner raise was done and the county mandated we do so. Additional information regarding the process (materials and equipment) can be provided if requested.

Memorandum

To: Stone Corral Irrigation District – Attn: Beto Rodriguez
From: Gabe Gaeta – Water Resource Specialist
Date: April 10, 2026
Re: East Kaweah GSA Board Meeting Notes – April 10

We attended the East Kaweah GSA (EKGSA) Technical Advisory Committee meeting on April 10. The meeting centered on SGMA implementation updates within the Kaweah Subbasin and miscellaneous GSA administrative items. Key notes for the meeting are provided below.

Status Report on Kaweah Subbasin Implementation

- The public comment period for the revised GSP included one comment related to interconnected surface water metrics and a request for the Kaweah Subbasin to adhere to guidelines set for by the Department of Water Resources (DWR).
- There is no update on coordination with DWR (slow process). DWR will be meeting individually with subbasins that have subsidence issues to review mitigation approaches. Staff indicated that DWR is taking subsidence very seriously and is not afraid to recommend subbasins back to the State Board if subsidence measures are insufficient.
- The 2025 Subbasin annual report included the groundwater quality exceedance policy. No exceedances or undesirable results were observed in the Kaweah Subbasin in 2025. Results could change in the future as more data is collected.

Well Mitigation Review and Recommendation

- Consultants walked through a redacted well mitigation claim. The TAC recommended that the claim did not meet the criteria for the domestic well mitigation program and should be denied. Findings indicated that there was no correlation between well failure and groundwater management activities or SGMA-related drawdown.

Flying Dragon Project

- Staff provided a status update on the Flying Dragon project. Earthwork and basin grading are largely complete, with minor finish grading and drainage modifications remaining.
- The final two permits are anticipated by May 2026, with a target construction completion timeframe of July 2026. Project cash flow remains stable due to timely reimbursement from project partners.

Prop 218 Update

- Staff presented a draft Proposition 218 framework and outreach strategy to address increased costs associated with GSP implementation and the domestic well mitigation program.
- The current assessment of \$7.35 per acre would increase to cover mitigation funding and operational needs. The proposal includes a short-term increase to recover prior costs over three years and additional funding for mitigation efforts, resulting in an estimated increase of approximately \$16 to \$21 per acre over the next five years.

East Kaweah Groundwater Sustainability Agency

MEMORANDUM TO THE TAC

TO: Michael D. Hagman, Executive Director

FROM: Scott Maskell, Management Analyst

DATE: April 10th, 2026

SUBJECT: AY2025 Invoicing Timeline

Staff recommend requesting the TAC approve the following timeline outlined below for AY2024:

Description	Allocation Year 2025
End of Allocation Year	September 30 th , 2025
Land IQ Data Complete	December 5 th , 2025
Wutchumna Deliverables Received	January 5 th , 2026
Surface Water Purveyor Received	Pending
Data Auditing	March – April
Mailer	April 27 th , 2026
Credit Manager Available	May 1 st , 2026
Credit Manager Locked	May 31 st , 2026
Invoices	June 5 th , 2026
Payment Due	July 15 th , 2026
Collections	2026-2027 (August 10 th , 2026)

Per Board recommendation, we will provide a 30-day window for the credit manager and 45-day window to collect payments.

Delays in invoices were due to:

- Wutchumna Surface water deliveries reported in January.
 - Ditch companies & districts then took a couple weeks to digest the numbers and report for their landowners.
- Staff also worked with the developer to modify the Credit Manager tool to allow for:
 - Surface Water Credits to be set by purveyor in priority of use.
 - Creation of “Groups” – users can now set multiple priority of uses based on groups within a water account.
- MKGSA & GKGSA Invoicing – work volume drastically increases for the dashboard developer and timelines get stretched. Staff waited until the bulk of GSA projects were done for the developer to focus on EKGSA.

EKGSA Staff recommend that due to consistent delays in invoicing we modify annual invoices to go out each year in March-May. This is beneficial to landowners as it sets specific timeline expectations.

---	---

1. **Call to Order:** Meeting was called to order at 8:36 a.m.
2. **Self-Introductions:** Executive Director provided introductions, and the roll was taken.
3. **Public Comment** – no comments
4. **Committee Administration**
 - a. Review and Approve Meeting Minutes for January 9, 2026, Hornung motioned to approve the minutes, Kilgore seconded the motion. Motion passed unanimously with those present.
5. **Committee Business**
 - a. Status of Kaweah Subbasin Implementation efforts
 - i. Review Subsidence BMP & Bulletin 118 – Intera presented the touch points on the BMP.
 - ii. Status update on Subbasin Modeling – Intera updated the TAC on the model efforts.
 - iii. Update on WY 2025 Annual Monitoring Report – Provost and Pritchard provided an update on the report
 - b. Flying Dragon Project Update – Hagman updated the TAC on the project
 - c. EKGSA Prop 218 Update – Provost and Pritchard updated the TAC on the Prop 218
 - d. LandIQ ET report to date – Maskell presented the ET report
 - e. GKGSA Potable Water Fill Station – Hagman/Larsen/Kilgore update TAC on the station
6. **New/Other Business:** None

EAST KAWEAH
GROUNDWATER SUSTAINABILITY AGENCY

MEMORANDUM TO THE MEMBERS

TO: Member Agencies
FROM: Michael D. Hagman, Executive Director
DATE: April 1, 2026
SUBJECT: FY 2026 Governance – Call for Funds

At the December 5, 2025, Special EKGSA Board meeting, the Board of Directors approved a motion to establish a FY2026 Governance call for funds, to be paid quarterly, in the total amount of \$246,086 for Governance efforts through the end of the 2026 fiscal year.

Enclosed is a “Governance Call for Funds” schedule, approved at the meeting, that delineates each share of the members call which is shared equally between all members. The call has been divided into four even amounts and will be invoiced January 1st, April 1st, July 1st and October 1st - each one due in 30 days.

Although we will send invoices to remind you that the quarterly payment is due, Members are responsible for the entire amount for their agency and the terms approved.

If you have any questions don't hesitate to contact Kathy Bennett (559) 562-2534.

Visalia, CA 93291

**NOTICE TO THE PUBLIC
PUBLIC COMMENT PERIOD**

PUBLIC COMMENTS: Members of the public may comment on any item not appearing on the Agenda. Under state law, matters presented under this item cannot be discussed or acted upon by the Commission at this time. For items appearing on the Agenda, the public is invited to make comments when the item comes up for Commission consideration. So that all interested parties have an opportunity to speak, any person addressing the Commission will be limited to a maximum of three (3) minutes, with a total of fifteen (15) minutes allotted for the Public Comment Period. Comments should be relevant to matters within the Commission's subject matter jurisdiction and not repetitive of previous speakers. If you wish to agree with a previous speaker, you may state so on the record. If you have a written statement, please hand it to the Commission Clerk and it will be included in the minutes of this meeting and circulated to the Commission. At all times, please use the microphone and state your name for the record.

Agenda

1. Call to Order – roll call
2. Public comment period (Information)
3. Notification of prior meeting recording from October 15, 2025 (Action)
4. Budget Presentation (Information)
5. Adopt Bylaws (Action)
6. GIS Mapping (Information)
7. Staff report on Flood Control District matters, flood control projects, update on:
 - a. Sultana Storm Drain Improvements and Recharge Project (Information)
 - b. Flood Control Capital Improvement Program (Information)
 - c. Kings River Channel Cleanup Project (Information)
 - d. Strathmore / Friant Kern Canal (Design) (Information)

Tulare County Flood Control Commission contact:
Denise England (559) 624-7000, DEngland@tularecounty.ca.gov

As a courtesy to those in attendance, please turn off or place in alert mode all cell phones and pagers. In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact Celeste Perez at (559) 624-7000.

J. Directing members to participate in panels with District staff for the purpose of interviewing and recommending outside consultants being considered related to flood control activities, projects, and programs; and

K. Acting on any other specific matter as directed by the Board.

III. MEMBERSHIP

In compliance with Section 7 of the Act, the Commission shall consist of seven (7) members, three (3) of whom shall be freeholders and residents of municipal incorporated territory of the County of Tulare, and the remaining members shall be freeholders residing anywhere within the county's borders.

A. Terms

All members of the Commission shall be appointed by and serve at the pleasure of the Board. After the initial time fixed by the Board's resolution establishing this Commission, the members shall serve terms of four (4) years, unless removed (at any time) by a majority vote of the Board.

B. Vacancies

Prior to the expiration of the term of a member, the occurrence of any of the following events shall cause a vacancy:

1. The member's death;
2. The member's resignation;
3. The member's ceasing to be a resident of the County of Tulare;
4. The member's removal from the Commission by the Board;
5. The member's position having been declared vacant by the Commission, which the Commission may declare by majority vote when an appointed member fails to attend three or more meetings in a calendar year without good and sufficient reason.

In the event of a vacancy due to the occurrence of any of the above-cited events, the Commission shall advise the Board so they may fill the vacancy.

another minimum requirement for voting is required by law. The provisions of the current edition of *Robert's Rules of Order* shall be applied to define any procedures not already defined by these bylaws, by the Brown Act (commencing with section 54950 of the Government Code), or by other applicable law.

Members may attend and participate by remote teleconferencing in compliance with applicable state law and as may be further authorized or restricted by the Board.

F. Placing Items on Agenda

Items shall be placed on the agenda as follows:

1. At the direction of the Board; and
2. As recommended by the Director of the Resource Management Agency or designee and approved by the Presiding Officer;
3. At the direction of the Presiding Officer; and
4. As otherwise provided in these bylaws.

V. OFFICERS

The Commission shall have a Chair and a Vice Chair (collectively the Officers), which shall have duties matching those defined for the Chair (President) and Vice Chair (Vice President) under the current edition of *Robert's Rules of Order* where those duties do not conflict with any defined by these bylaws. The Officers shall be elected at the first regular meeting of the calendar year and shall serve until their successors are elected. Officers may be reelected indefinitely. Should the office of Chair or Vice Chair become vacant, a new officer shall be elected for the remainder of the term. If the office of Chair is vacated, the Vice Chair shall not be obligated to assume the Chair for the remainder of the term, but is eligible to be elected as Chair. If the Chair is absent, the Vice Chair may serve as Chair or the Commission may elect a Chair Pro Tem for the meeting. If the Chair and Vice Chair are both absent, or if the Chair is absent and the office of Vice Chair is vacant, the Commission shall elect a Chair Pro Tem for that meeting.

The Presiding Officer as used throughout these bylaws refers to the Chair or, if the Chair is unavailable and a Chair Pro Tem has been elected, the Chair Pro Tem, or, if the Chair is unavailable and no Chair Pro Tem has been elected, the Vice Chair.

VI. AMENDMENT OF BYLAWS

A. Amendments Proposed by Commission

Any Commission member may propose amendments to these bylaws by submitting them to the Commission at any regular meeting, and at the next regular meeting, the amendment shall be voted upon. Any such amendment must be approved by a two-thirds

STONE CORRAL IRRIGATION DISTRICT
District Carry Over Water Policy
(REVISED October 15, 2024)

The Board of Directors of Stone Corral Irrigation District has hereby **REVISED** its Carry over Water Policy for each of its Landowners. This policy will be in conjunction with the Carry over Water Policy established by the Bureau of Reclamation for the Friant Division.

GENERAL:

The following are the Carryover Guidelines for Stone Corral Irrigation District, Central Valley Project (CVP). These Guidelines were developed based on the 2002 **Carryover Guidelines for the Friant Division** that was released on February 12, 2003. These Guidelines apply to the Carryover Water in Millerton Lake, a Friant Division reservoir, from the previous Water Year to the proceeding Water Year.

It is intended that these Guidelines continue to be in effect unless terminated, rescinded, or amended in writing by the Board of Directors. Accordingly, the principles and procedures set forth in these Guidelines may be retained for Rescheduling Project Water in the Friant Division in subsequent Water Years. The annual dates, rates and charges and associated Standard Operating Procedure (SOP) governing the accounting and rate setting procedures for Rescheduling Project Water in the Friant Division, will require revision in order to correspond with the then current Years updated information.

A. STORAGE PRIORITY IN MILLERTON LAKE:

1. For purposes of these Guidelines, San Joaquin River Settlement and the Friant Division Project Water allocation supply shall have priority of storage in Millerton Lake over Carryover water as determined by Reclamation.
2. Other categories of water in need of carryover capability and storage capacity will be considered only after the needs of both the upcoming allocated Project Water and the Carryover Project Water are satisfied to the extent possible. Other categories of water include, but are not limited to, Cross Valley Contractors Project Water supplies, San Joaquin River Restoration Settlement, Environmental Water Account (EWA) water established pursuant to the Cal-Fed Bay-Delta Program, and all other water.
3. All rescheduled water will be the first water conveyed to the contractor.

B. PAYMENT:

1. **Contract Water Rate for Carryover Water.** In order to allow landowner(s) to reschedule their water, they must have paid for that water being carried over into the following year by (December 31st) of the current water year. If water charges have not been paid in to the district, then all water not paid for, will revert back to the district's control. If a landowner is paid in full then the landowner must pay the appropriate Project water rate per acre-foot for all rescheduled

water, to be determined by the Bureau. The appropriate water rate for Project Water must be paid in advance of water delivery. **As per the Bureau of Reclamation, no more than 10% of the full districts contracted water will be allowed for carryover.** All contracted water to be carried over water into the following year must not equal more than 10%- or 1,000-acre foot. **Should the amounts equal more than 10%, those landowners wanting more than 10% of their allocation carried over will be prorated accordingly. Landowners will be solely responsible for all rescheduling costs.**

2. **Rescheduling (Carryover) Fee.** For Water rescheduled into the upcoming contract year, the Landowner must pay the Rescheduling Fee at the time the Contractor submits its final request for the quantity of water to be rescheduled. **If Rescheduled/Carryover Water is subsequently not delivered or spilled, the Fees advanced will not be refunded, and will not be applied to the Contractor's other water service obligations.**

C. **APPROVAL AND SCHEDULING:**

1. **Request.** The Landowners' written request to carryover water must be provided to Stone Corral Irrigation District (District) by the 20th working day of December. The request must include:
 - (a) The total quantity of Carryover water to be Rescheduled; and
 - (b) Acknowledgment that the landowner agrees to abide by these Guidelines for Carryover approval.
2. Failure to provide the request in a timely manner may affect the approval of the total amount of water requested to be rescheduled.
3. Prior to the 15th working day in January, the District shall inform the landowner of the maximum quantity of Carryover Water that can be accommodated as of February 28th.
4. **If Landowners have water carried over in a normal water supply year (100% Class I) they will still be required to purchase their appropriate allocation of the upcoming water supply. This requirement is to ensure all the districts water allocated to them is sold from year to year.**
5. **Schedule.** The District will review and attempt to provide written approval or denial of any water delivery schedule in a timely manner, and if necessary, shall set a priority for accommodating in storage, each type of Carryover water requested.
6. **Water Carried Over.** Carryover shall not adversely affect the upcoming Project Water supplies. Carryover water stored in Millerton Lake may be reduced to avoid impact to storage of the Project Water supplies as determined by Reclamation. The following procedures shall be used in determining the need for a reduction in carryover water:
 - (a) The District shall, as long as Carryover water remains in storage and available for delivery, periodically review the potential for spill from Millerton Reservoir to the San Joaquin River, and upon request, report the results to the landowners.

- (b) Should at any time the district determine that a spill is probable; the district shall determine the total amount of water, including Carryover water that must be evacuated from storage to avoid spill conditions. The district shall further determine, to the extent possible, the time frame associated with the evacuation requirement.
- (c) Landowners with Carryover water remaining in storage shall take steps, to the extent possible, to take delivery of their Carryover water in accordance with the requirements set forth by the district.
7. **Priority.** If there is insufficient storage space in Millerton Lake to store both Carryover water and the current water supplies, the Carryover water shall be evacuated first. The district will attempt to notify the landowner for evacuation of Carryover water. If more than one landowner has Carryover water in storage, the Carryover water lost due to spill conditions will be prorated by landowner based upon the amount of Carryover water in storage at the time of spill. Carryover water in the reservoir shall be reduced by the amount of water prorated by Contractor. (Example: if 25% of water is spilled, then each landowner will receive a 25% reduction on water carried over)
8. **Transfer of Carryover Water.** Transfer of Carryover water must be accomplished in accordance with the transfer provisions of the Contractor's Water Service Contract and with the existing CVPIA Interim Water Transfer Guidelines. Carryover water is subject to available conveyance and storage capacity in Millerton Lake. Transferred Carryover Water is subject to all of the provisions of Carryover Water. Landowners may only transfer water within the district boundaries when allocation is less than 100% Class 1. When allocation is 100% Class 1, landowners can transfer their carry-over to other districts if needed as long as all appropriate fees are "PAID IN FULL"
9. **Reservation.** The district reserves the right to deny any request for Carryover if such denial is due to factors beyond the district's control or circumstances not contemplated or foreseen during the preparation of these guidelines.

The following (REVISED) Carryover Water Policy is hereby adopted by the Board of Directors of Stone Corral Irrigation District at their regular Board of Directors Meeting on November 12th, 2024.

The district hereby reserves the right to amend or delete this Carry Over Water Policy as it becomes necessary.

Beto Rodriguez

To: Beto Rodriguez
Subject: RE: Invoice 47378

Good morning Beto,

The plate was put in so we would not divert from the bottom of the turnout, due to excess sediment. Later I had the plate removed when the canal elevation dropped.

Best,

Gene Kilgore
